**SONOMA  
COUNTY, CA**

# HELLO CAMPERS,

We would like to invite and warmly welcome new and returning Campers to join us for all the activities we have planned for 2017! Summer Camp will be full of your traditional favorites as well as some new activities we've never offered before. With prior notice, tennis and/or swimming clinics may be added before or after themed camps and field trips for additional fun. For most camps there will be a discount given to families who bring more than one child so please remember to invite other family members and friends!

In addition to the planned summer camp schedule below, we also offer you the ability to customize any kids' activity during your stay at Mayacama. There is no date or time of day that is off limits to camp or activities so please let us work around your golf, wine tasting, massage, or just plain no kids relaxation time.

Even before Camp Mayacama officially begins on June 12, you will see that we have planned many additional activities and Kids' Nights for you to sign up for! This includes annual themed events on key holidays such as Easter, Mother's Day, Memorial Day, Independence Day, Labor Day, Halloween, and Christmas. Browse through this camp schedule and see how many different events you can attend; with such a huge variety to choose from and the ability to request a customized camp, I am confident we can accommodate your childcare needs.

In order to participate in any or all of these activities, have your parents call me, email me, or log on to the Members Only Website and register you to join in on the fun, friends, thrills, intrigue, and excitement all summer long!

Let's enjoy a summer to remember together!

These pieces of glass are then designed in a layered manner and through a series of firings (temperatures ranging from 1,200-1,500 degrees) a new piece of glass is formed. Glass is an extraordinary medium for artistic expression; you won't believe your eyes when you see the amazing projects that your child will produce in this workshop. Instead of blowing the glass, kilns are used to make the glass molten. Each piece begins with hand-cut, broken, pulled, and ground pieces of glass. These pieces of glass are then designed in a layered manner and through a series of firings (temperatures ranging from 1,200-1,500 degrees) a new piece of glass is formed. Glass is an extraordinary medium for artistic expression; you won't believe your eyes when you see the amazing projects that your child will produce in this workshop. Projects will be available for pick-up the following week or shipped upon request.
